

**ABSTRACT**

A multi-purpose device capable of assuming a plurality of configurations, including a first configuration suitable for use as a tote-bag or single-person seat-cushion, a second configuration suitable for use as a two-person seat cushion, and a third configuration suitable for use as a blanket or cape. The device includes a soft body, a first strap and optional second strap on the soft body, and a first fastener assembly and an optional second fastener assembly on the soft body, such as a zipper(s), for retaining the device in the first configuration.
